Cotton Yarn Manufacturing

SAP Business One for Cotton Yarn Manufacturing

Run your Growing Business Faster, Smarter & Simpler with SAP Business One

Client Based out in Maharashtra - Cotton carded yarn | Cotton combed yarn | Cotton compact yarn
(Approx. 37000 + spindles capacity)

Yarn Add-on for SAP Business One – seeks to integrate the business processes involving critical areas in the production planning which includes raw material, finance, inventory, machine management, Doff tracking, quality, sales and dispatches.

Yarn Add-on helps business to manage key functions such as production planning, purchasing, maintaining inventories, interacting with suppliers, providing customer service and tracking orders. Once the plant is equipped with Yarn Add-on, everything is at your fingertips, with this, the senior management is aware of developments at different units, which helps to utilize the resources better. It helps in minimizing inventories and maximizing output.

Need for ERP

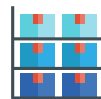

SAP Business One for Cotton Yarn Manufacturing

Why SAP Business One?

Faster, Smarter & Efficient -
It allows users to spend more time on
business than struggling with software
